

Technical and Troubleshooting Guide for Families

Before getting started, how do I . . .	2
Know if my device is supported?	2
Know which operating systems are supported by <i>i-Ready</i> ?	2
Find out what operating system my device has?	3
Confirm which iPadOS version my iPad is using?	3
Know which browsers are supported by <i>i-Ready</i> ?	4
Find out what browser version I am using?	4
Update my browser?	4
Update school-/district-managed devices?	7
Clear the cache?.....	7
Download Google Chrome and/or Mozilla Firefox?	8
While logging in, what should I do when . . .	8
I get a “Your internet browser is not supported” message?	8
I get a “Your internet browser does not provide an optimal <i>i-Ready</i> experience” message?	9
I am being directed to another page to log in?	9
I am getting an SSO error code (e.g., S602, S607)?	10
I need to log in on an iPad?	11
While working on lessons, what should I do when . . .	12
My child experiences issues during a lesson?	12
I am working on a Chromebook and lessons are not loading or get stuck?	12
My child sees a “You have no work assigned” message?	13
If I am still having trouble with <i>i-Ready</i>, how do I get help?	13

Before getting started, how do I . . .

Know if my device is supported?

For a complete list of supported configurations, please see the [system requirements](#) for *i-Ready Connect™* programs.

For those using desktop or laptop computers, devices will work if they have the right operating system and/or browser. To find out if your device is running a supported operating system and browser, you can run a system check by visiting cdn.i-ready.com/systemcheck/. An instructional video is available at [How to Run an i-Ready System Check](#).

For those using an iPad®, *i-Ready* is available to students through the *i-Ready Connect for Students* app. Students must use *i-Ready* on iPads that are compatible with iPadOS® 18.1 or above to access all assessment and instruction. Students with iPads on iPadOS 17.3–18 will still be able to use the *i-Ready Connect for Students* app, but this is not recommended since no testing is done on these versions. This app will be continually updated and supported with future releases. The iPad app is free and available for download through the Apple App Store®.

Note that iPad minis are not supported and that the *i-Ready Connect for Students* app is not accessible on other tablets or on the iPhone®.

We fully support all iPad models that meet the following criteria:

- A10 chipset or greater
- Supports iPadOS® 18.1 or greater
- Screen resolution: 2048 x 1536 at 264 pixels per inch (ppi)
- Screen diagonal of 9.7 inches or greater*

Note: iPadOS 17.2 and lower are no longer supported and are blocked.

*Students with iPad minis® can use the *i-Ready Connect for Students* iPad app if they are using a device capable of operating on iPadOS 17.3 or above. However, please note that *i-Ready was not designed for the screen size of an iPad mini and we do not support its use.*

Know which operating systems are supported by *i-Ready*?

An operating system (OS) is the software that allows users to run programs on the device. It controls the basic jobs of input, output, storage, and processing. Our current supported operating systems are:

Windows 10—found on Windows PCs

Windows 11—found on Windows PCs

MacOS 11 or higher—found on Apple Mac models

ChromeOS™ (136 or higher)—found on Chromebooks™

iPadOS 18.1 or higher—found on iPads

Find out what operating system my device has?

The easiest way to know what operating system is being used on a **computer/laptop**, and if it is an *i-Ready*-supported OS, is to visit the *i-Ready Connect* Configuration Check page here: cdn.i-ready.com/systemcheck/. An instructional video is available at [How to Run an i-Ready System Check](#).

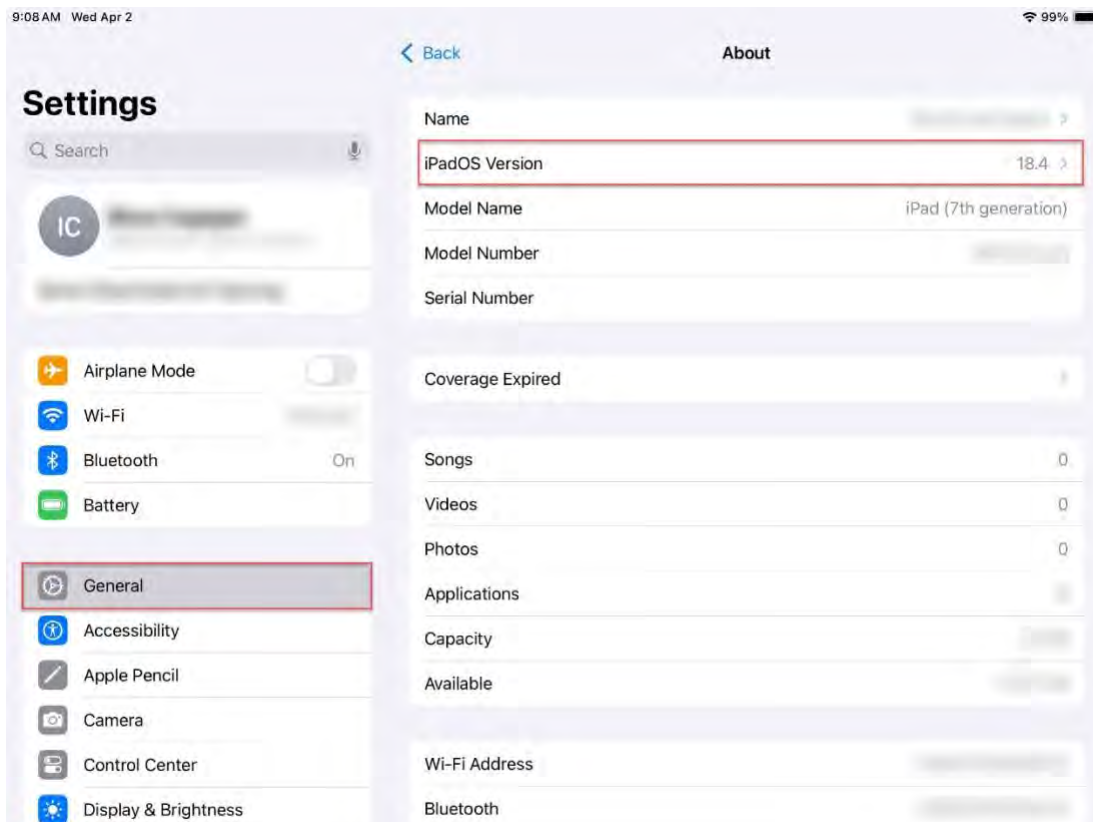

In the “Operating System/Browser Check” section, you will see the OS and the browser version number:

		Result
Operating System:	Windows 10	PASS
Browser:	Chrome 135.0.0.0	PASS
Browser cookies:	Enabled.	PASS
JavaScript:	Enabled.	PASS

Confirm which iPadOS version my iPad is using?

Go to Settings > General > About > iPadOS Version

Know which browsers are supported by *i-Ready*?

A browser is the “door” to get to the internet on a device. There are browsers like Edge® and Safari® that come with the device when purchased. There are others like Chrome® and Firefox® that can be downloaded to the device after being purchased. **For the 2025–2026 school year, *i-Ready*-supported browsers are:**

Chrome 136 or higher

Firefox 136 or higher

Safari 18.1 or higher

Edge 136 or higher

Find out what browser version I am using?

The easiest way to know what browser version is being used on a **computer/laptop**, and if it is an *i-Ready*-supported browser version, is to visit the *i-Ready Connect* Configuration Check page here: cdn.i-ready.com/systemcheck/. An instructional video is available at [How to Run an *i-Ready* System Check](#).

In the “Operating System/Browser Check” section, you will see the browser and the version number:

The screenshot shows a table titled "Operating System/Browser Check" with a subtitle: "This section will validate that your current browser is meeting the minimum requirements for using i-Ready." The table has three columns: the first column lists the requirement, the second column shows the current status, and the third column shows the result. The "Browser" row is highlighted with a red border.

Operating System/Browser Check		Result
Operating System:	Windows 10	PASS
Browser:	Chrome 132.0.0.0	PASS
Browser cookies:	Enabled.	PASS
JavaScript:	Enabled.	PASS

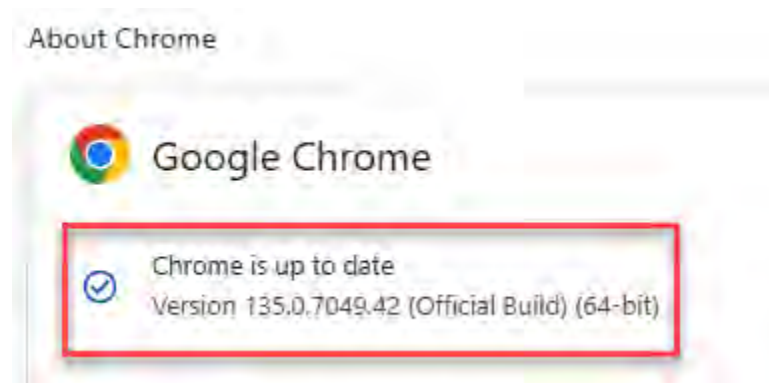

Update my browser?

Google Chrome®

Google Chrome will update automatically as new iterations are released to the public. To verify that your version of Chrome is the latest or update it manually, follow these steps:

- Open the Google Chrome browser.
- Click the “Customize and control Google Chrome” button (three dots below the browser “X” button) in the upper right corner of the screen.

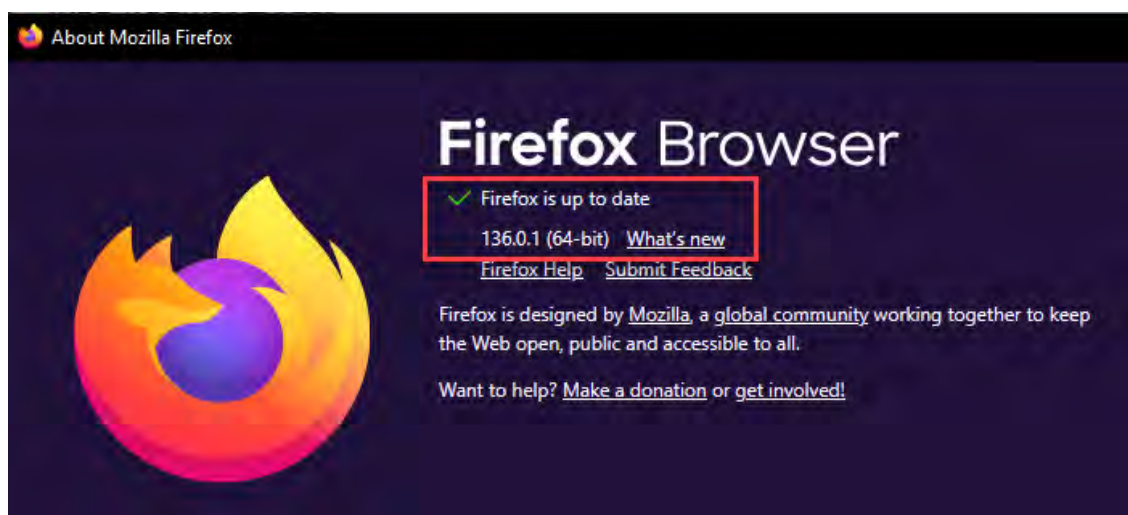

- From the dropdown menu that appears, select “Help”; then select “About Google Chrome.”
- The window that appears will automatically check for updates **and show you the current version of Chrome**. If an update is available, Chrome will be updated automatically. After Chrome is updated, click the “RELAUNCH” option to restart Chrome and complete the update.

Mozilla Firefox

Mozilla Firefox should automatically download updates and prompt you when they are available to install. To verify that your version of Firefox is the latest or update it manually, follow these steps:

- Open the Mozilla Firefox browser.
- Click the “Open menu” button (three lines found below the browser “X” button) in the upper right corner of the screen.
- In the menu that appears, click the “Help” option at the bottom.
- Select “About Firefox.”
- The window that appears will automatically check for updates **and show you the current version of Firefox**. If an update is available, you can click the “Update to [version number]” button to install the update, where “version number” is the latest version of Firefox.

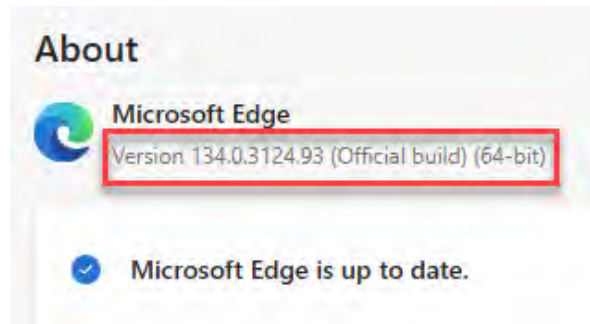

Microsoft Edge

Microsoft Edge will update automatically as new iterations are released to the public. To verify that your version of Edge is the latest or update it manually, follow these steps:

- Open the Microsoft Edge browser.

- Click the “Settings and more” button (three dots below the browser “X” button) in the upper right corner of the screen.
- From the dropdown menu that appears, select “Help & Feedback”; then select “About Microsoft Edge.”
- The window that appears will automatically check for updates **and show you the current version of Edge**. If an update is available, Edge will be updated automatically. After Edge is updated, you will need to relaunch the browser.

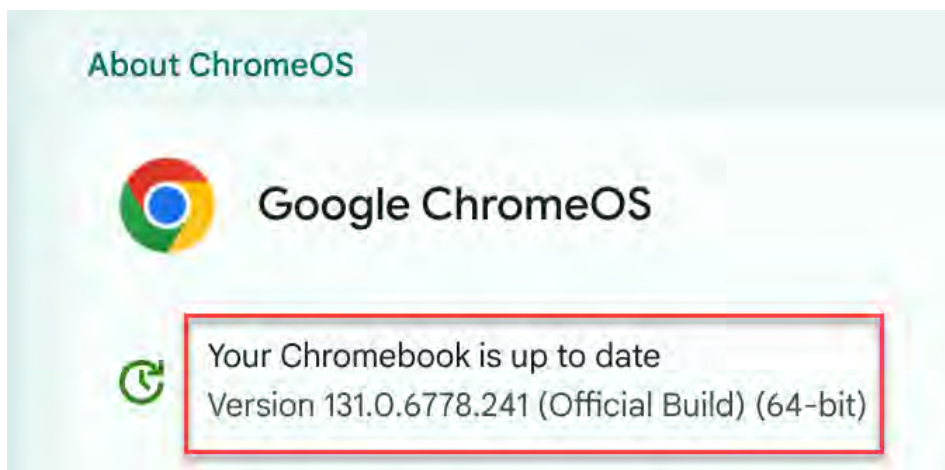

Safari

Safari is tied to the operating system. You will potentially need to update your OS. We strongly suggest downloading Google Chrome or Mozilla Firefox.

On Google Chromebooks

By default, Chromebooks will stay up to date. However, occasionally, they will need to be manually updated. To do this:

1. Click on the time on the bottom right corner.
2. Click on the Settings icon (looks like a gear).
3. On the bottom left side, click “About ChromeOS.”
4. Click on “Check for updates.”

Update school-/district-managed devices?

If the device in use is issued from the school/district, and you are unable to manually update or install a browser, contact the school/district IT team for instructions or to request an update to the device.

Clear the cache?

Each browser has a cache that remembers data from past visits to the same page. The cache helps to run things faster, as it remembers past information, getting you to the page and page details faster than if you started fresh each time. However, we suggest clearing the cache from time to time, as it will help with performance issues.

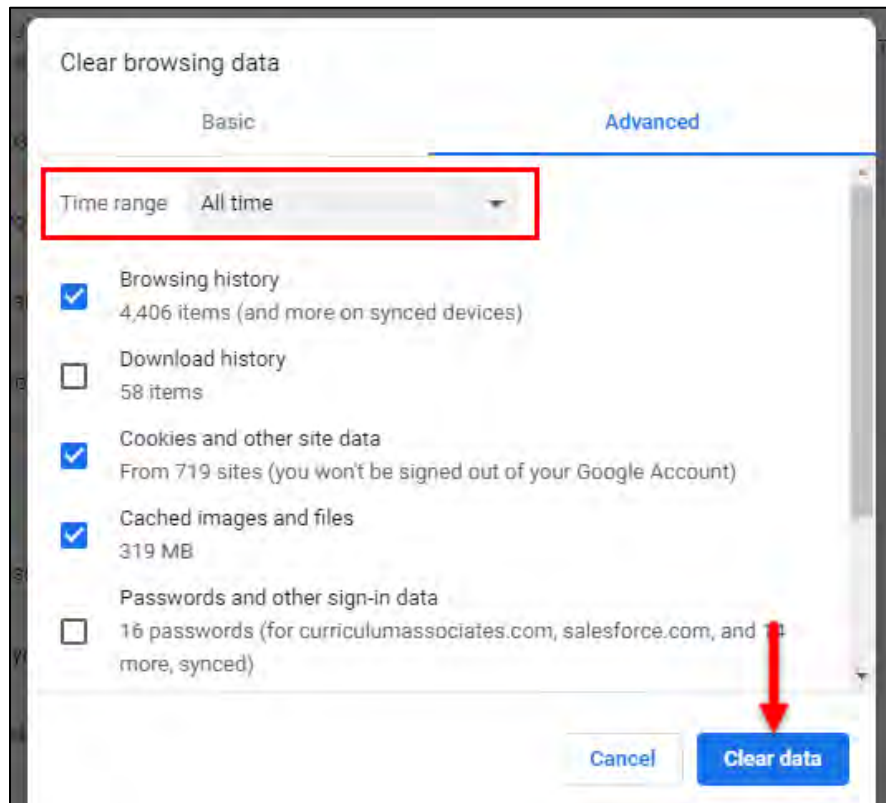

The easiest way to clear the browser cache from Chrome, Firefox, Safari, or Edge is to use one of the following key combinations:

For most browsers: CTRL + Shift + Delete ([How to clear your cache on Chrome](#))

On a Chromebook: CTRL + Shift + Backspace

Using Safari on a Mac: CMD + Shift + Delete ([How to clear cache using Safari on a Mac](#))

This should take you to the option to clear the browser cache. **Be sure to change the dropdown to clear all the cache ("All time," etc.)** and not just the last few minutes. Below is an example from Chrome (other browsers will be similar):

Download Google Chrome and/or Mozilla Firefox?

If you find that your browser failed but your operating system passed, we suggest downloading Google Chrome and/or Mozilla Firefox. Both are free to download and will be another way to get to the internet.

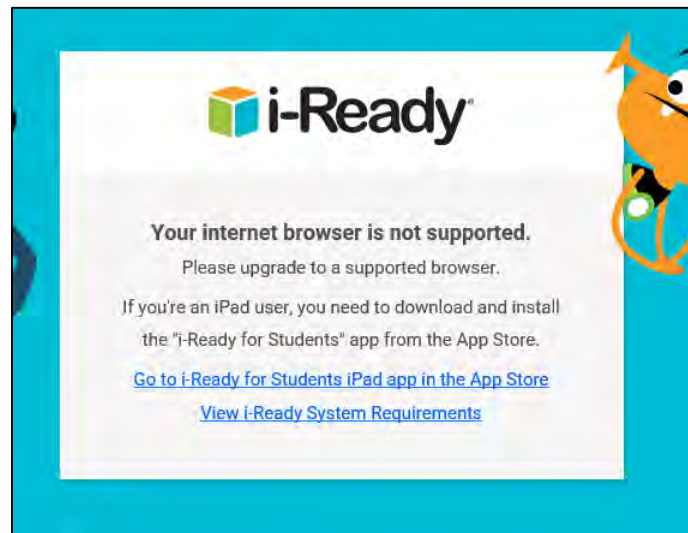

- To download Google Chrome, click this link and click “Download Chrome,” which will begin the download: www.google.com/chrome/.
- To download Mozilla Firefox, click this link and click “Download Now,” which will begin the download: www.mozilla.org/en-US/firefox/new/.
- To download Microsoft Edge, click this link and click “Download Now,” which will begin the download: <https://www.microsoft.com/en-us/edge>.

Once downloaded and installed, you should see the browser icon, either on your desktop or in your list of programs.

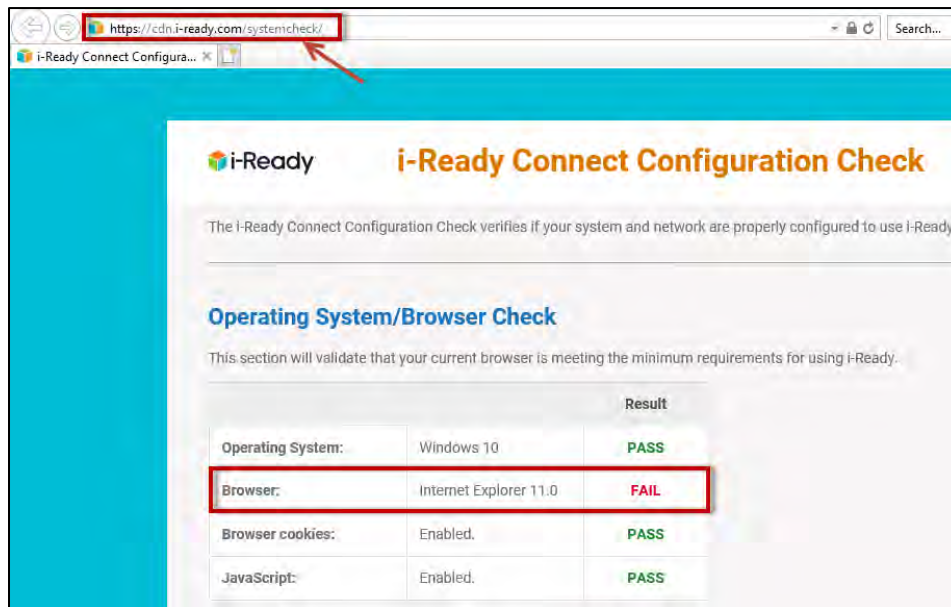

While logging in, what should I do when . . .

I get a “Your internet browser is not supported” message?

If your operating system or browser is too old, or unsupported, you may see the following message when you go to the login page:

To find out why this message is appearing, click the following link to run the *i-Ready Connect* Configuration check, which will indicate why the internet browser is not supported (example of configuration check results below): cdn.i-ready.com/systemcheck/. An instructional video is available at [How to Run an i-Ready System Check](#).

Compare the results of your computer/laptop to the chart below to ensure the OS and/or browser is supported for the 2025–2026 school year:

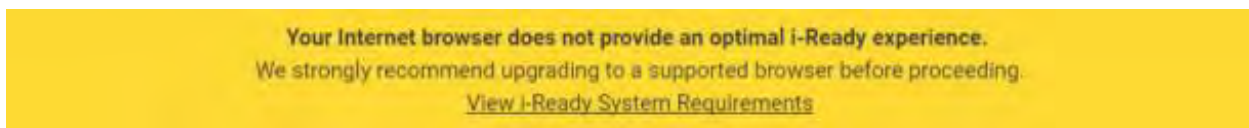

Operating System	Edge®	Safari®	Firefox®	Chrome™
Windows® 10	136 or higher	N/A	136 or higher	136 or higher
Windows 11	136 or higher	N/A	136 or higher	136 or higher
MacOS 11 or higher	*	18.1 or higher	136 or higher	136 or higher
MacOS 12 or higher	*	18.1 or higher	136 or higher	136 or higher
Google Chrome™ OS	N/A	N/A	N/A	136 or higher**

*Edge on MacOS has not been fully tested and is not supported for use with *i-Ready* at this time.

If the **operating system** fails, the computer/laptop is not supported. We suggest trying a different device to use *i-Ready*.

If the **browser** version fails and is lower than what appears in the chart, please update your browser to a supported version.

I get a “Your internet browser does not provide an optimal *i-Ready* experience” message?

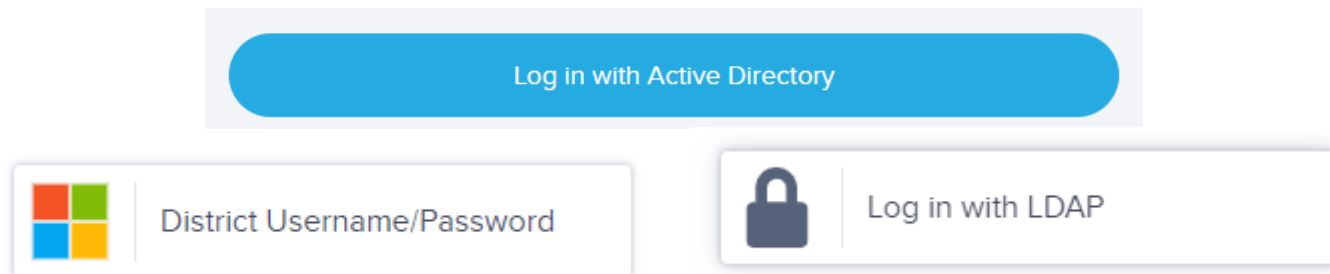

If you see this banner on our login page, the browser being used is older but still allowed. You may log in; however, we recommend updating to a newer version at your earliest convenience. The chart above shows the list of supported operating systems and browsers for the 2025–2026 school year.

I am being directed to another page to log in?

Some schools and districts use a feature frequently referenced as single sign-on (SSO), which provides students with streamlined access to *i-Ready* and other online programs the school uses without having

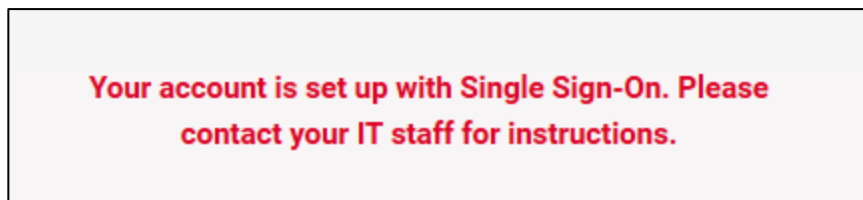

separate usernames and passwords for all programs being used. The school will have one portal the students can log in to and access all online programs. This login option was chosen by the school/district, which also provides the usernames and passwords to students. **When trying to log in to a student account, please use the student username and password that was provided, not any parent/guardian login information.**

When using an SSO called Clever®, students will be redirected to the appropriate portal from <https://login.i-ready.com/>. You might see a button that notes “Log in with Active Directory,” “District Username/Password,” “Log in with LDAP,” or something like these.

When you see any one of these buttons, click on it to take you to the SSO login page and enter the district-assigned username and password.

SSO users might also see this message when attempting to log in at <https://login.i-ready.com/>:

We suggest reviewing documentation that the educator and/or school has provided that perhaps has the link or steps to get to the appropriate login portal. We would also suggest visiting your school’s and/or district’s website, which often include the portal login pages.

[I am getting an SSO error code \(e.g., S602, S607\)?](#)

If you are seeing an error code while trying to log in to your child’s school portal, this most likely is due to a rostering issue with the student’s account. Here is what we can suggest depending on the code you are seeing:

S601: Please contact your school.

S602: Please contact your school; potentially a rostering issue.

S603: Please try again in a few minutes; if the issue persists, please contact your school.

S604: You are trying to log in directly to *i-Ready*, but your school uses an SSO portal. Please go to your school’s SSO portal to log in.

S605: Please contact your school.

S606: Please contact your school.

S607: User is not active; please contact your school.

S608: Account is locked; please contact your school.

I need to log in on an iPad?

After ensuring that the iPad you are using is a model supported by *i-Ready*:

1. Download the free *i-Ready Connect for Students* app from the App Store.

2. Determine the login mechanism used by your child's school.
 - If your child's district/school does **not use a portal**, your child should open the *i-Ready Connect for Students* app and log in to *i-Ready* using the credentials provided by their teacher. Note that students who usually log in on a laptop or computer at <https://login.i-ready.com/> will be able to use the iPad app directly.
 - If your child's district/school uses an SSO service provider, you will likely see this message:

In these instances, you should confirm with the school and/or teacher which SSO service provider is being used. The most popular SSO apps used are Clever Instant Login or ClassLink™ Launchpad.

Download the appropriate app, log in using their district/school portal credentials, and click on the *i-Ready* icon.

While working on lessons, what should I do when . . .

My child experiences issues during a lesson?

In some cases, you might encounter technical issues when your student is working on lessons. These issues can appear in different ways (e.g., “An error occurred” message, a freezing screen, blank screens), but here are some initial basic troubleshooting suggestions:

- Clear the browser’s cache (CTRL + Shift + Delete). At times, if the student is encountering the issue several times, the browser has cached, or “remembered,” the place where they continue to get stuck. By clearing the cache, it may allow the student to continue from that spot.
 - [How to clear your cache on Chrome](#)
 - [How to clear cache using Safari on a Mac](#)
- If you have a different browser available (e.g., Google Chrome, Mozilla Firefox, Edge, or Safari), please try using an alternate browser to see if the issue persists. In some cases, it will allow the student to continue because a new browser may not have cached student account information.
- Try incognito/private window. Each browser has a “private” window option. These windows often resolve issues as extensions, cache, cookies, etc. are not enabled or saved. To try this, open a browser and do the following, depending on the browser:
 - For Chrome  : **CTRL + Shift + N**
 - For Firefox  and Edge  : **CTRL + Shift + P**
 - For Safari  : **CMD + Shift + N**
- Check out the [i-Ready Technical Support YouTube™ Channel](#) for instructional tech-based videos.
- Try a different device, if available, to confirm if the issues continue.

I am working on a Chromebook and lessons are not loading or get stuck?

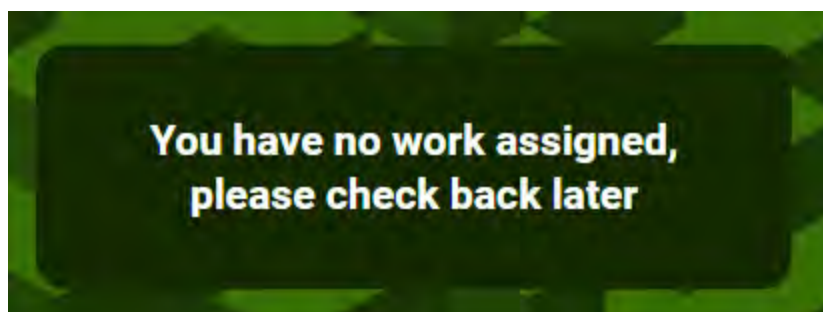

Along with the suggestions found in the previous section, if you are using a Chromebook, here are additional suggestions:

- Ensure that the video resolution is set to 1024 x 768 or greater. In some cases, the video resolution affects what appears on the screen in our lessons.
- When the lesson seems to load continuously or seems stuck because there is nothing to click to move forward, try to zoom out (CTRL + "-" or use browser zoom settings). Like the video resolution, in some instances, not all lesson items appear due to the screen size. Zooming out might allow any buttons that are missing to appear.
- Confirm if the *i-Ready* cookies are being blocked. Cookies are used to remember frequently visited pages. If students inadvertently block cookies, this will prevent the students from getting to our page, especially if they are using SSO portals. Look out for this icon in the URL bar:

My child sees a “You have no work assigned” message?

If your student sees this message when they should be working on lessons, we suggest reaching out to the teacher or school, as they would need to review the student’s account settings, activities, and reports to determine why the student is not seeing lessons.

If I am still having trouble with *i-Ready*, how do I get help?

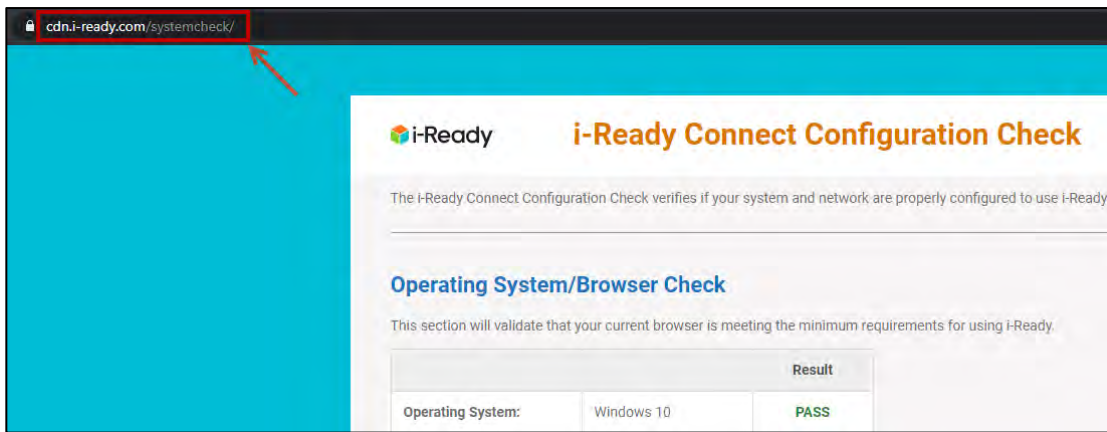

You can contact the *i-Ready* Support team.

Email: i-ReadySupport@cainc.com

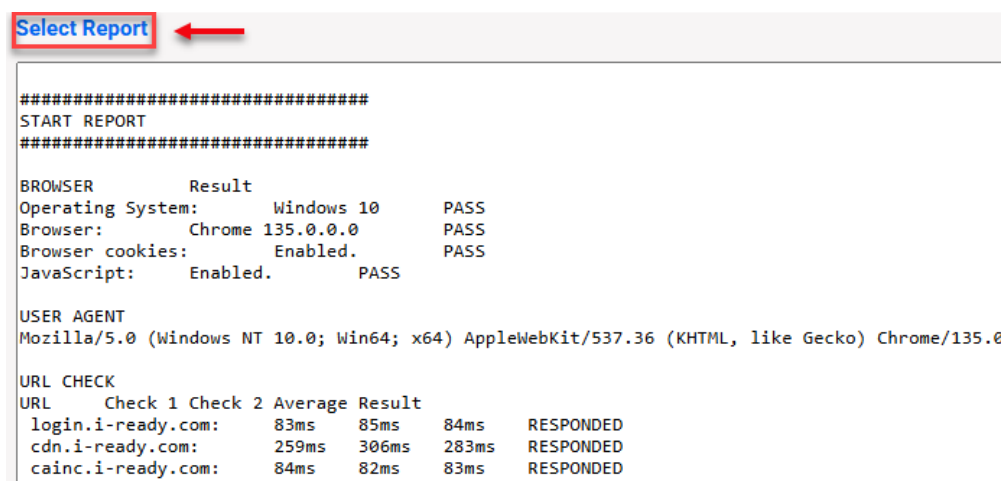

Phone: (800) 225-0248

Monday–Friday, 7 a.m.–9 p.m. ET

You will likely be asked for information about your computer when you speak to a service representative. You can prepare for this call by running a configuration (i.e., system) check on your computer by opening this webpage in the browser that is being used for *i-Ready*: cdn.i-ready.com/systemcheck/.

To share the results, scroll down and click the “Select Report” hyperlink in the “Report” section of the System Check.
